Kalakala Alliance Foundation, non-profit 501 (c)(3), MV Kalakala, and all 4  
1927 Steel Electrics (Quinault, Nisqually, Illahee, and Klickitat) have all  
been given a bum deal today!

As the 4 Steel Electrics are being prepared to depart the State and be towed to Mexico we ask our State representatives within the Judicial system to stop this before all rights of these historic vessels face their final destiny. It is wrong to take all of them to Mexico and be cut up only as scrap. These vessels are past physical treasures that deserve some kind of respects and preservation. We have federal protective laws within our constitution that are being violated by our State today.
